Fiserv VISION Virtual Meetings Attract Record Attendance

**Brookfield, Wis., June 12, 2008** —Fiserv VISION, a business unit of Fiserv, Inc. (NASDAQ: FISV), recently conducted a series of virtual meetings on changes to the Fair and Accurate Credit Transactions Act (FACT Act) amendments to the Fair Credit Reporting Act. A major component of these changes has come to be known as the Red Flags Rule, which requires financial institutions to implement an Identity Theft Program. Nearly 300 representatives from the Fiserv VISION client base participated in the sessions held in early June.

The Fed's new Red Flag laws require financial institutions to take action to prevent, detect, and mitigate identity theft for all of their customers. Representatives from Fiserv VISION and Fiserv's Integrated Risk Management Group reviewed what the Red Flag Rule entails, and provided strategies financial institutions can deploy to protect their customers and comply with the rule changes, which is mandatory as of November 1, 2008.

Fiserv VISION hosts several virtual meetings on a wide variety of topics throughout the year. These informative webcasts are an effective communication vehicle through which Fiserv VISION can provide education on industry trends, introduce new products and services and assist clients in complying with the latest regulatory requirements. Fiserv VISION clients appreciate the fact that no travel is required and an unlimited number of people from the same organization can benefit from hearing the same message at the same time. Multiple sessions are held to accommodate the schedules of Fiserv VISION clients across the country.
